Reasons for allowance

1. The following is an examiner's statement of reasons for allowance:

The present invention is directed to a video recording/reproducing apparatus for recording various video data as files in a disk. Independent claims 1 and 8 identify the uniquely distinct feature "recording control section records the video data in an area of the video file selected from said recording menu screen during a recording operation, and when the recording operation is not completed even when the video data is recorded until said area becomes full, continuously records the video data in a vacant area of said recording/reproducing disk." Independent claim 2 identifies the uniquely distinct feature "control section compares a recording-completed time of the video data recording-programmed, and if said recording-programmed time is longer than said recording-completed time, gives warning from said display section." The closest prior art, Hendricks (US Pat. No. 5,798,785) either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
